

# Single Phase Transformer<sup>7</sup>

Our single phase transformer is produced in the form of pin type, terminal type, and wire harness type. In the case of small single phase transformer, we have produced the products of complicated structure such as especially products with many tabs, based on rich know-how of manufacturing. We have supplied the clip type transformer of the patent No. 1152741 for a conglomerate H Company, and have placed a separate line of small and medium-sized transformers for the good management in compliance with small products' characteristics. The designs of our company's transformers are optimized according to the type of load equipment and its application, thus our products are manufactured through order production.

Types	1Φ
Class of insulation	E, B, F, H class
Input voltage	0~6600V (order production)
Output voltage	0~6600V (order production)
Capacity	10VA~1MVA
Applications	For power supplying and operating
Features	<ul style="list-style-type: none"><li>- Variety of applications including electric power supply</li><li>- Ensure reliability and safety</li></ul>

(unit : mm)

Product name	Specification	W	D	H
Single Phase Transformer	1P 300VA 220V / 110V 60Hz	120	115	130
	1P 500VA 220V / 110V 60Hz	140	130	150
	1P 1KVA 220V / 110V 60Hz	160	160	165
	1P 1.5KVA 220V / 110V 60Hz	182	160	185
	1P 3KVA 220V / 110V 60Hz	220	180	230
	1P 5KVA 220V / 110V 60Hz	245	210	250
	1P 10KVA 220V / 110V 60Hz	320	260	330
